

ICIEB 2018

2018 International Conference on Internet and e-Business

Singapore during April 25-27, 2018
www.icieb.org

ICIEB aims at bringing together researchers and practitioners who are interested in e-Business technology and its current applications. The scope of the conference covers low-level technological issues, such as technology platforms, internet of things and web services, but also higher-level issues, such as business processes, business intelligence, value setting and business strategy. Furthermore, it covers different approaches to address these issues and different possible applications with their own specific needs and requirements on technology. These are all areas of theoretical and practical importance within the broad scope of e-Business, whose growing importance can be seen from the increasing interest of the IT research community.

2018 International Conference on Internet and e-Business (ICIEB 2018) is the premier forum for the presentation of new advances and research results in the fields of theoretical, experimental, and applied Internet and e-Business. The conference will bring together leading researchers, engineers and scientists in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Innovative business models
Enterprise application integration
Business process re-engineering
Virtual enterprises and virtual markets
Supply, demand, and value chains
Virtual organizations and coalitions
Customer relationship management
e-Collaboration and e-Services
Inter-organizational systems
Future work environments for e-Business
